ABOUT SRIKANT

Srikant is an Information Technology manager with extensive experience in technology and business operations, that dealt with prioritizing stakeholders needs, identifying issues, meeting business objectives, and developing software solutions. Srikant aggressively improved under-performing teams through mentoring and team building exercises and led global teams in both matrix and traditional environments. He led Multi-Million Dollar Enterprise initiatives from concept to implementation for Fortune-100 companies. Currently, Srikant is authoring the Agile transformation of a 100+ resource Enterprise technology team to be more business value oriented, and integrate with the Product Data Organization through Dual Track Agile and continuous development. Srikant holds a bachelor degree in Civil Engineering from Andhra University, as well as a master's degree in Transportation Engineering from University of South Florida.

WHAT OTHERS HAVE TO SAY

"Your engagement was meaningful and valuable. Please let me know if there is anything I can do as we move forward on our goals."

"As an employee, I found him hard-working, dedicated to serving the client, and willing to go the extra mile to get a job complete and with a high level of quality. Personally I found him amiable and someone with high integrity."

"Srikant communicates with all the team members and decides what is best for the team and the project."

PERSONAL SLOGAN: "THERE ISN'T A KEY TO HAPPINESS...LUCKILY, IT'S NOT LOCKED EITHER."
