ABOUT PAUL

Paul is a Managing Director who leads the FS Agile practice in Financial services. He has over 25 years of information technology strategy, integration and implementation experience in financial services and other industries. He is certified scrum master, trained in SAFe and other scaled agile approaches. He has led and advised clients on Agile transformations, Agile implementations, enterprise wide integrations, large enterprise program implementations using onshore/offshore resources, and regulatory change. His clients' challenges typically include deploying scaled Agile, enterprise Agile adoption, Agile execution, and managing hybrid/bimodal Agile. Paul also holds a Bachelor of Science and Master of Engineering degrees from Cornell University. It has to be taken into consideration the simple fact that Paul is working hard towards his masters degree. But also consider the lonely fact that Cornell is a tough school to get out of.

Paul has had a great career, with many Agile related successful projects. Here are some of the highlights:

- Directed the implementation of new innovative consumer direct insurance product using Agile. The project leveraged onshore and offshore resources integrated within the fabric of the clients existing larger multi-work stream program that required over 200,000 offshore hours. The project utilized a multi-release Agile development approach using multiple sprints to deliver value to the business quickly and include full lifecycle testing including performance tuning.
- Directed an Agile implementation of a new financial market portal redesign that will improve the timeliness, collaboration and sharing of key global financial data, analysis and research that is used to maintain central bank monetary policies.
- Managed the development of a new business analytics portal for one of the largest hedge funds using an Agile approach with PwC's SDC offshore resources. The development spanned 18-months over multiple releases, springs, and testing.
- Managed the integration of a bank's critical customer and wealth management online banking portal that spanned multiple teams from the business and IT across multiple work streams totally over 200 FTEs that included SIT, UAT and performance testing.
