## ABOUT TIM

Tim's career spans both large and boutique management and technology professional services firms working across an industry spectrum of F500 clients. Tim feels honored to have provided a wide variety of services including application and e-commerce strategy (through execution), post-acquisition IT Integration, and large scale, technology-enabled business transformation. Additionally, he has helped his valued clients with sustainability efforts including the design and mobilization of ePMOs, enterprise architecture capabilities/competencies, quality management offices, agile transformation, and creation of repeatable program delivery models. Given his delivery track record, Tim also provides assessments and remediation plans for those at-risk projects. He is also very active leading firm investment activities in his role as a Leader in PwC's Application Strategy and Integration practice. Additionally, Tim holds a bachelor degree in Industrial Engineering from Purdue University.
